

SOP FOR DEAD BODY MANAGEMENT

STANDARD PRECAUTIONS TO BE FOLLOWED BY HEALTH CARE WORKERS WHILE HANDLING DEAD BODIES OF COVID :-

standard infection prevention control practices should be followed at all times.

these includes:

- Hand hygiene
- Use of personal protective equipment (e.g., water resistant apron, gloves, masks, eyewear)
- Safe handling of sharps.
- The bag housing dead body, instruments and devices used on the patient is to be disinfected.
- The linen and environmental surfaces should be disinfected.

REMOVAL OF THE BODY FROM THE ISOLATION ROOM OR AREA :-

- The health worker attending to the dead body should perform hand hygiene. Ensure proper use of PPE (water resistant apron, goggles, N95 mask, gloves)
- All tubes, drains and catheters on the dead body should be removed.
- Any puncture holes or wounds (resulting from removal of catheter, drains, tubes or otherwise) should be disinfected with 1% hypochlorite and dressed with impermeable material.
- Caution is to be applied while handling sharps such as intravenous catheters and other sharp devices. They should be disposed into a sharps container.
- Plug oral, nasal orifices of the dead body to prevent leakage of the body fluids.
- If the family of the patient wishes to view the body at the time of removal from the isolation room or area, they may be allowed to do so with the application of standard Precautions.
- Place the dead body in leak-proof plastic body bag. The exterior of the body bag can be decontaminated with 1% hypochlorite. The body bag can be wrapped with a mortuary sheet or sheet provided by the family members.
- All used/soiled linen should be handled with standard precautions, put in biohazard bag and the outer surface of the bag disinfected with hypochlorite solution.
- Used equipments should be autoclaved or decontaminated with disinfectant solutions in accordance with established infection prevention control practices.

- All medical waste must be handled and disposed of in accordance with bio-medical waste management rules.
- The health staff who handled the body will removal personal proactive equipment and will perform hand hygiene.
- Provide counseling to the family members and respect their sentiments.

ENVIRONMENTAL CLEANING AND DISINFECTION :-

- All surface of the isolation area(floors, bed, railing, side tables, IV stand, etc.) should be wiped with 1% hypochlorite solution; allow a contact time of 30 minutes, and then allowed to air dry.

HANDLING OF DEAD BODY IN MORTUARY:-

- Mortuary staff handling COVID dead body should observe standard precautions.
- Dead body should be stored in cold chambers maintained at approximately 4° C.
- The mortuary must be kept clean. Environmental surfaces, instruments and transport trolleys should be properly disinfected with 1% hypochlorite solution.
- After removing the body, the chamber door, handles and floor should be cleaned with sodium hypochlorite 1% solution.

TRANSPORTATION :-

- The body, secured in a body bag, exterior of which is decontaminated poses no additional risk to the staff transporting the dead body.
- The personnel handling the body may follow standard precautions(surgical mask, gloves).
- The vehicle, after the transfer of the body to cremation/burial staff, will be decontaminated with 1% Sodium hypochlorite.

AT THE CREMATORIUM/BURIAL GROUND :-

- The Crematorium/burial Ground staff should be sensitized that COVID-19 does not pose additional risk.
- The staff will practice standard precautions of hand hygiene, use of masks and gloves.
- Viewing of the dead body by unzipping the face end of the body bag(by the staff using standard precautions) may be allowed, for the relatives to see the body for one last time.

- Religious rituals such as reading from religious scriptures, sprinkling holy water and any other last rites does not require touching of the body can be allowed.
- Bathing, kissing, hugging etc of the dead body should not be allowed.
- The funeral/burial staff and family members should perform hand hygiene after cremation/burial.
- The ash does not pose any risk and can be collected to perform the last rites.
- Large gathering at the crematorium/ burial ground should be avoided as a social distancing measure as it is possible that close family contacts may be symptomatic and/ or shedding the virus.

ROLE AND RESPONSIBILITY OF GOVT. EMPLOYEES :-

- The Hospital will transfer the details of next of kin of the deceased COVID patients to the Executive Officer-Cum-Nodal Officer, Angul Municipality .
- The Executive Officer-Cum-Nodal Officer, Angul Municipality will get in touch with the next of kin of the deceased COVID patients for final Darshan with PPE and all other protection.
- The dead body is to be cremated/disposed at Karadagadia, Cremation Ground, Angul Town.

The guidelines above are explanatory in nature though not exhaustive. Further instruction may follow in due course.
