Sub: Guidelines for setting up of Biogas plants under GOBARdhan scheme of SBM-G - reg.

Do

Madam/ Sir,

With reference to the above-cited subject, I am to inform you that one of the key components under the Swachh Bharat Mission-Grameen Phase II scheme, is the GOBARdhan program under which Biogas plants are to be set up in the rural areas. The biogas plants will convert the cow dung waste generated in the villages into useful resources.

In this regard, the Department after discussions with OREDA, has decided to take up community-level bio-gas plants in the rural areas of the State with incentive support from SBM-G. The following are the modalities and procedures to implement the same:

1. Community Groups and Institutions running Gaushalas in rural areas like Trusts, Milk Unions/ Cooperatives, NGOs, and FPOs having cattle populations shall be eligible to take up Community-level biogas plants.
2. Only those institutions having a minimum of 15 no. of cattle inside a single premise shall be eligible.
3. Standard size of 6 cu.m. community biogas plant costing about Rs. 98,000 can be taken up. (Model, design and estimate for 6 cu.m. Deenabandhu model biogas plant is attached in Annexure 1).
4. Maximum of Rs. 50 lakhs per district is provisioned as per the SBM-G guidelines for taking up community biogas plants. The funding pattern per project will be in the ratio of 70:30 in which 70% of the project cost will be supported as grant from SBM-G

	local daily
Scrutiny of proposal at District and forwarding to Block	15 days from last date of application
Field verification and sanctioning of projects	15 days from forwarding the eligible list to block for field verification
Construction by beneficiary institutions	4 months from sanction of the project
Payment to beneficiary	15 days post intimation by the beneficiary

It is therefore requested to finalise the beneficiaries as per the above instructions within the timeline and ensure smooth implementation of the GOBARdhan program in the State.

Yours faithfully

Principal Secretary to Govt.

Encl: As above

CC: All BDOs for information and necessary action

## Annexure 1

**Model Design and Estimate for Installation for 6 cubic meter Deenbandhu  
Model cow dung based Biogas Plant**

SI No.	Description of materials	Quantity	Unit rate (in Rs.)	Approximate cost (in Rs.)	Remarks
1	Pit digging for foundation and RCC work	15 labours	500/- each	7,500.00	
2	Well brunt bricks	3000 nos.	@7,000/- per thousand	21,000.00	
3	Cement	32 bags	@350/- per bag	11,200.00	
4	Broken granite stone chips	150 cft	@60/- cft	9,000.00	
5	Sand (Coarse and fine @130 cft. each)	260 cft	@20/- cft	5,200.00	
6	Trained mason charges	12-man days	1,000/- per day	12,000.00	
7	Labour charges for construction (2-man days /day)	24-man days	500/- per day	12,000.00	
8	8 mm Iron rod and Binding wire etc.	50 kg	L.S	3,500.00	
9	Labour charges towards initial feeding of cow dung	10-man days	500/- per day	5,000.00	Additional labor charges
10	Inside painting of doom	3 litres of paint with painting charges	L.S	2,200.00	
11	Doom pipe and 6' AC pipe	2.1 meter	L.S	500.00	
12	Distribution pipeline (HDPE) with fitting accessories etc.	50 meters	L.S	3,500.00	
13	Double burner Chula	1 no.	2,200/-	2,200.00	
14	Transportation charges for Materials		L.S	3,000.00	
	<b>Grand Total:</b>			<b>97,800.00</b>	
			<b>Rounded to</b>	<b>98,000.00</b>	
		(Rupees ninety-eight thousand) only			

## **Guiding Principle for Biogas Plants for Community Institutions and Groups**

Biogas plants will facilitate the conversion of cow dung waste generated in the villages into useful resources. The biogas plants may be taken up by community groups and institutions running Gaushalas like Trusts, Milk Unions/ Cooperatives, NGOs and FPOs having cattle populations inside a single premise in rural areas.

### **Site Selection**

1. The site should be situated within the institution's premise it aims to serve and it should have access to at least 15 cattle within the premise.
2. The site for biogas plant should be preferably at a higher level as compared to the surroundings so that accumulation of water can be avoided.
3. The site should have access to adequate water supply for the biogas plant's operations, including feedstock preparation, cleaning of equipment, and maintenance.
4. Biogas plant should be installed in the open space to have the full benefit of sunlight.

### **O&M**

1. Biogas infrastructure should be owned, operated, and managed by the Institution itself.
2. The slurry left out from the digester is very rich in Nitrogen, and Phosphorus and is a good fertilizer for crops. Therefore, the slurry may be used directly in the fields, or it may be used after drying by converting into bio-fertilizers/ organic manure.

**Application for Biogas plants under GOBAR-dhan**

I, Sri/Smt ..... in the capacity of ..... (Designation) of ..... organization is applying for the construction of a ..... cu.m. biogas plant (minimum 6 cu.m.) of the Deenbandhu model. We have ..... numbers of cattle inside our premises. We also declare that no biogas plant has been established within the premises as of date and we have sufficient land available inside the premises for the construction of a biogas plant. We undertake to complete the construction of the bio-gas plant within four months from the date of sanction and intimation to us by the BDO..... (Block Name). We agree to cooperate whenever any Government official visits for inspection of the plant and will provide all necessary information and support. We understand that the institution will have to take full responsibility for filling cattle dung in the plant and carry out necessary maintenance for the same. The slurry generated will be safely managed and will not be thrown in drains and open spaces. Photocopy of the relevant documents are enclosed.
